## Comar 5P.i ECO aluminium windows: It's all in hand.

**Recyclable**, Comar aluminium can be recycled an infinite number of times without any loss to its properties. Over 75% of aluminium used in construction is from recycled sources, making aluminium a true cradle-to-cradle material with an indefinite lifecycle.

**Sustainable**, there are over 300 years worth of known resources of aluminium's raw material Bauxite. As aluminium building products have lifetimes running into decades, a vast material storage bank, close to 170 million tonnes, is being created for future recycling use.

**Eco-nomical**, Comar's efficiencies in operations and component sourcing ensure that Comar 5P.i. ECO offers market leading cost-effectiveness.

**Eco-logical**, Comar aluminium is 100% recyclable, is sustainable and 75% of the power used in aluminium's processing comes from hydro-electric sources.

**Deliverable**, market leading deliveries are achieved by Comar's 100% in-stock strategy, so Comar 5P.i. ECO profiles and accessories are delivered to meet ever tighter site and production deadlines.

For further information on the system please call 020 8685 9685, email [projects@parksidegrp.co.uk](mailto:projects@parksidegrp.co.uk) or download the Comar 5P.i. ECO brochure from our website. [www.comar-alu.co.uk](http://www.comar-alu.co.uk)
