

All the best buildings are wearing Comar.

All the best buildings are wearing the leading British architectural aluminium brand, Comar. Aluminium curtain walling, window, door and ground floor framing systems are constantly updated to meet the latest design innovations and trends.

Comar is 100% British owned with aluminium systems designed for the demands of the UK market. This means a multi-function, standard range of profiles that achieve bespoke, design driven solutions and a committed strategy of delivery, large stocks of all systems are held to ensure site deadlines are always met, season after season.

This latest design shows Comar 6EFT 4sided SG, a sheer, clean structural glazed system that gives the façade no visible sight-lines. To accentuate the clean lines, blue tinted glazing has been incorporated with solar control and acoustic capability.

Function is created by selecting Comar 6EFT Vent, a concealed window system that provides opening vents but, when in the closed position, seamlessly integrates into the façade.

The design creates a clean, sleek image, exceeding the design brief and hitting site deadlines.

Comar, the architectural aluminium brand that creates endless design opportunities with guaranteed fast track, delivery. For further information please call 020 8685 9685 or email projects@parksidegrp.co.uk. www.comar-alu.co.uk
