

Lights Camera Action Details Colours Downloads

www.comar-alu.co.uk

The new range of Comar aluminium profiles launches today at www.comar-alu.co.uk. Key notes this season include downloadable CAD details, NBS Specifications, testing to CWCT Sequence B and the very latest colours and finishing technology for Comar's aluminium curtain walling, windows, ground floor framing and doors.

Simply click on and register on the 'Comar Partner' tab to download typical design details or create your own facade from over 700 aluminium profiles. If you require bespoke profiles, email your design and Comar can provide feasibility and budget costs.

Accentuate façades with a palette of over 400 different textures, colours and finishes from RAL, Syntha Pulvin and anodising such as Sandalor. New additions include finishes from Interpon; their Elements and Fusion collections ensure the very latest coatings are available at your fingertips.

Demanding designs are backed up with exceptional tested reassurance. World renowned Taywood Engineering has completed its testing of Comar 6EFT 4sided, 2sided structural glazing and capped curtain walling, all with concealed vents to the CWCT's Sequence B test regime at a design safety pressure of 3600Pa. The test has the added benefit of being witnessed and audited by the CWCT.

For further information, contact projects@parksidgrp.co.uk or simply call on 020 8685 9685 to organise a meeting with your regional Comar Consultant.
