ARCHITECTURAL ALUMINIUM SYSTEMS

## Audi Showroom - Battersea, London

Comar Architectural Aluminium Systems with their approved fabricator Magnum Aluminium Products (1993) Ltd, regularly work with the above architects. This close working relationship means that design details and specifications can be agreed prior to site-works.

This showroom utilised Comar 7 sliding doors; the inherent flexibility of Comar 7 can be seen on this project. Comar 7 sliding doors with bolt-on automatic gearing housed in Comar's unique door beams were used for customer entrance. The same product range with its array of profiles meant that large sliding/folding vehicle access doors could be installed which naturally integrated directly into Comar 6 Curtain Walling.

Comar 6 curtain walling provided the span required, which was double glazed in 24mm safety glass and polyester powder coated to specific Audi brand colours.

Comar Architectural Aluminium Systems provides an innate advantage to specifiers because of their inherent design flexibility, fast fabrication and installation which achieves site deadlines and ensures that retail outlets can begin trading with the minimum of disruption.

### PROJECT DETAILS

**Architects**  
R.D.J.W. Architects.

**Fabricator**  
Magnum.

**Main Contractor**  
Try Accord Limited.

**Project Value**  
-

**Systems Used**  
Comar 5lt, Comar 6 & Comar 7.

**Location**  
Battersea, London.

# Audi Showroom - Battersea, London

**Comar, the leading British Aluminium Systems House, designs and extrudes over 700 aluminium profile sections. A team of specification consultants provide project-by-project design, calculations and NBS specification advice to architects. Comar distributes profiles to a nationwide network of fabricators for manufacture and installation.**

## Retail Aluminium Architecture

Inherent strength and slim sight-lines make Comar aluminium the specification product of choice for all retail outlets. Comar offers extensive systems which integrate to provide aesthetic appeal to potential retail customers.

Step through Comar 7, an extensive range of sliding, automatic, folding or swing doors. Overhead Comar 6 creates sloped, pitched or barrel vaults which cast light throughout the retail complex or outlet. Comar 1,3,4 & 8 integrate with Comar 7 to provide shop-fronts with various angle returns and height capability. Comar 6 curtain walling houses the envelope with a variety of cover caps which complement panels and glazing.

## Commercial Aluminium Architecture

Statement of function is the key element of commercial building design. From designing industrial units to corporate headquarters the flexibility of Comar Aluminium Systems can integrate with panel systems and provide curtain wall with opening vents and windows in a variety of configurations. Comar can

powder coat the aluminium system to your RAL, BS or Syntha Pulvin colour to complement the façade.

## Education & Public Building Aluminium Architecture

Comar have worked in conjunction with Local Authorities to design specific products for use in the education and public building sector. The nature of public building construction demands cost effective, robust solutions. Comar 2 is a cost saving alternative to curtain walling, creating glazed façades for medium rise buildings, stairwells and entrances. Comar 2 integrates with Comar 5 and 5LT windows with espagnolette locking handles to provide security and Comar 7 Doors with anti-finger traps to provide safety. Comar's integrated systems ensure a cost effective, aesthetic façade with security and safety as standard.

## RIBA CPD Provider

Comar provides RIBA assessed CPD Seminars to architects and specifiers throughout the UK. There are two seminars available; please complete the feedback for further details.
