ARCHITECTURAL ALUMINIUM SYSTEMS

Beau Sejour Leisure Centre

Comar Architectural Aluminium Systems, with their approved fabricator Rooflight Systems, completed this Leisure Centre in Guernsey. Working closely with London-based Orms Architects helped Rooflight to achieve the design brief. Because the installation was carried out in the still functioning leisure centre, speed of refurbishment was of key importance. When the time factor is critical, Comar has no rivals: materials are delivered within 15 days and the systems speedy fabrication and installation ensures that business is not hindered during the building's refurbishment.

The original façade around the swimming pool and the gym area was removed and replaced with stick-build Comar 6 - the on-site curtain wall construction option. Double glazed laminated glass was fitted into the curtain walling, as a safety measure, for the swimming pool. Comar 6 was used again for the new health and beauty and café area, integrating Comar 7 swing, butt hung rebated doors.

Comar 6 curtain wall corner mullions are adjustable to 135°, which means roof glazing applications are achievable. Here this feature was used for sloped glazing for the swimming pool area façade's top panelling which, as a result, allows extra light in the swimming area. The glazing was complete with Comar 5 top open windows, which integrated elegantly into the Comar 6 façade. The profile was polyester powder coated to a light grey RAL colour, which created the overall aesthetically pleasing design.

PROJECT DETAILS

Architects
Orms Architects.

Fabricator
Rooflight Systems Ltd.

Main Contractor
Dew Construction Ltd.

Project Value
£650,000.

Systems Used
Comar 5, 6 and 7.

Location
Guernsey.

Beau Sejour Leisure Centre

Comar, the leading British Aluminium Systems House, designs and extrudes over 700 aluminium profile sections. A team of specification consultants provide project-by-project design, calculations and NBS specification advice to architects. Comar distributes profiles to a nationwide network of fabricators for manufacture and installation.

Retail Aluminium Architecture

Inherent strength and slim sight-lines make Comar aluminium the specification product of choice for all retail outlets. Comar offers extensive systems which integrate to provide aesthetic appeal to potential retail customers.

Step through Comar 7, an extensive range of sliding, automatic, folding or swing doors. Overhead Comar 6 creates sloped, pitched or barrel vaults which cast light throughout the retail complex or outlet. Comar 1,3,4 & 8 integrate with Comar 7 to provide shop-fronts with various angle returns and height capability. Comar 6 curtain walling houses the envelope with a variety of cover caps which complement panels and glazing.

Commercial Aluminium Architecture

Statement of function is the key element of commercial building design. From designing industrial units to corporate headquarters the flexibility of Comar Aluminium Systems can integrate with panel systems and provide curtain wall with opening vents and windows in a variety of configurations. Comar can

powder coat the aluminium system to your RAL, BS or Syntha Pulvin colour to complement the façade.

Education & Public Building Aluminium Architecture

Comar have worked in conjunction with Local Authorities to design specific products for use in the education and public building sector. The nature of public building construction demands cost effective, robust solutions. Comar 2 is a cost saving alternative to curtain walling, creating glazed façades for medium rise buildings, stairwells and entrances. Comar 2 integrates with Comar 5 and 5LT windows with espagnolette locking handles to provide security and Comar 7 Doors with anti-finger traps to provide safety. Comar's integrated systems ensure a cost effective, aesthetic façade with security and safety as standard.

RIBA CPD Provider

Comar provides RIBA assessed CPD Seminars to architects and specifiers throughout the UK. There are two seminars available; please complete the feedback for further details.
