ARCHITECTURAL ALUMINIUM SYSTEMS

Hugh Baird College, Bootle

In response to the Government's extensive schools' renovation plan, Comar Architectural Aluminium Systems have been working closely with Local Authorities in order to make its systems suit flawlessly to the needs of refurbishments. Because Comar's curtain walling, door and window systems are specified constantly in education and public building renovation projects, Comar has a clear understanding of the issues that are taken into consideration: health and safety, time constraints and aesthetics.

Hugh Baird College is an excellent example where Comar's systems versatility comes to the fore. The seven storey high façade was fitted with ribbon windows in a composite of two fixed lights and a horizontal pivot window. Due to the variety of beads and gaskets, Comar 5 windows can be glazed up to 45mm which, in this project, allowed for the combination of glazed panels and glass. This creates a wealth of design options and is employed here to maintain the appearance of the original 1960's façade. The entrance is fitted with Comar 7 swing doors, which are available in a variety of configurations, such as rebated, pivot, sliding, sliding/folding and swing.

This is an education building; therefore, it was imperative to finish the entire project over the six week school break. When the time factor is critical, Comar has no rivals: materials are delivered within 15 days and the systems speedy fabrication and installation ensure the normal running of the college was not affected.

PROJECT DETAILS

Architects

-

Fabricator

Doors & Windows.

Main Contractor

J.P.F.

Project Value

£180,000.

Systems Used

Comar 5 and 7.

Location

Bootle.

Hugh Baird College, Bootle

Comar, the leading British Aluminium Systems House, designs and extrudes over 700 aluminium profile sections. A team of specification consultants provide project-by-project design, calculations and NBS specification advice to architects. Comar distributes profiles to a nationwide network of fabricators for manufacture and installation.

Retail Aluminium Architecture

Inherent strength and slim sight-lines make Comar aluminium the specification product of choice for all retail outlets. Comar offers extensive systems which integrate to provide aesthetic appeal to potential retail customers.

Step through Comar 7, an extensive range of sliding, automatic, folding or swing doors. Overhead Comar 6 creates sloped, pitched or barrel vaults which cast light throughout the retail complex or outlet. Comar 1,3,4 & 8 integrate with Comar 7 to provide shop-fronts with various angle returns and height capability. Comar 6 curtain walling houses the envelope with a variety of cover caps which complement panels and glazing.

Commercial Aluminium Architecture

Statement of function is the key element of commercial building design. From designing industrial units to corporate headquarters the flexibility of Comar Aluminium Systems can integrate with panel systems and provide curtain wall with opening vents and windows in a variety of configurations. Comar can

powder coat the aluminium system to your RAL, BS or Syntha Pulvin colour to complement the façade.

Education & Public Building Aluminium Architecture

Comar have worked in conjunction with Local Authorities to design specific products for use in the education and public building sector. The nature of public building construction demands cost effective, robust solutions. Comar 2 is a cost saving alternative to curtain walling, creating glazed façades for medium rise buildings, stairwells and entrances. Comar 2 integrates with Comar 5 and 5LT windows with espagnolette locking handles to provide security and Comar 7 Doors with anti-finger traps to provide safety. Comar's integrated systems ensure a cost effective, aesthetic façade with security and safety as standard.

RIBA CPD Provider

Comar provides RIBA assessed CPD Seminars to architects and specifiers throughout the UK. There are two seminars available; please complete the feedback for further details.
