

Striking entrance?  
Design reassurance from Comar 7.

SPECIALISTS IN  
ARCHITECTURAL  
ALUMINIUM SYSTEMS

Whether it's a finishing touch or striking centrepiece to a project, Comar 7 is the natural solution for sliding, patio, sliding/folding, rebated, swing and Armoured Glass (A.G.) doors. The extensive range includes drained low-thresholds for the DDA, anti-finger traps for safety, thermally broken P.i solutions for Approved Document L and high performance Tempest doors, which on test, reported "No leakage" at 2400Pa. Sections are robust and time proven in high traffic areas such as retail units, schools and colleges.

For automatic door solutions, Comar produce bespoke door beams which house most major manufacturers bolt-on auto door gearing, reducing the need for third party timber and packings, thus increasing the overall aesthetic appeal of the entrance.

Comar 7 is backed by Comar's market leading delivery and project-by-project technical advice. For further details, please call 020 8685 9685, or visit [www.comar-alu.co.uk](http://www.comar-alu.co.uk)
