

Technical Datasheet

NEW CUT CLEATS & TAPPED BACK PLATES FOR DOORS AND SASH RAILS

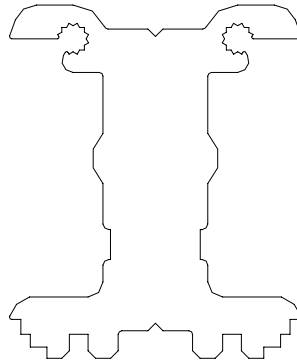

Due to technical advances in Comar door construction, using the latest adhesives and pins with Comar punch tools, welding cleats are no longer necessary. For this reason CS34 welding cleat will only be available in bar length. Comar now stock a full range of prepared cleats using CS35 extrusion with the same fixing centres as CS34.

Tapped aluminium cleat back-plates Ref: IN005XSLF are now available in steel Ref: IN007XSLF

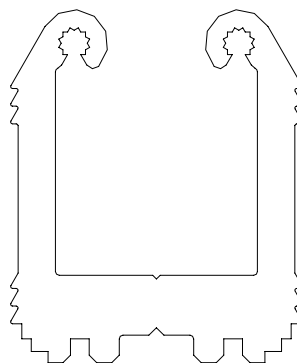

For further information please contact Comar Technical Department by e-mail at Technical@parksidegrp.co.uk or telephone 020 8685 9685
