

Dukes Industrial Park - Chelmsford

The entrance to these prestigious offices creates a focal point for the whole building. The use of white cladding creates a stark contrast with the black tinted, mirrored glazing.

The integration of Comar Aluminium Systems is evidenced in this project: the Comar 7 door range and Comar 6 curtain walling, with its slim 50mm sight lines, was selected. Centres were planned to echo the door lines creating the overall symmetrical finish. Comar 6 has the flexibility to incorporate Comar 7 swing doors directly into the façade by using specially extruded transoms. The door can then be hung on overhead closers and Comar 6 mullions create the door jambs. The benefit of this is two-fold: as there is no need for additional coupling profiles, this ensures slim sight lines and reduced costs.

This level of detailing was a prime reason why Comar was selected and, due to Comar's market leading delivery, the project ran to site deadlines and to budget.

PROJECT DETAILS

Architects
G.R. Mullendor.

Fabricator
Rooflight.

Main Contractor
Rooflight.

Project Value
£200,000.

Systems Used
Comar 5, Comar 6 & Comar 7.

Location
Chelmsford.

Dukes Industrial Park - Chelmsford

Comar, the leading British Aluminium Systems House, designs and extrudes over 700 aluminium profile sections. A team of specification consultants provide project-by-project design, calculations and NBS specification advice to architects. Comar distributes profiles to a nationwide network of fabricators for manufacture and installation.

Retail Aluminium Architecture

Inherent strength and slim sight-lines make Comar aluminium the specification product of choice for all retail outlets. Comar offers extensive systems which integrate to provide aesthetic appeal to potential retail customers.

Step through Comar 7, an extensive range of sliding, automatic, folding or swing doors. Overhead Comar 6 creates sloped, pitched or barrel vaults which cast light throughout the retail complex or outlet. Comar 1,3,4 & 8 integrate with Comar 7 to provide shop-fronts with various angle returns and height capability. Comar 6 curtain walling houses the envelope with a variety of cover caps which complement panels and glazing.

Commercial Aluminium Architecture

Statement of function is the key element of commercial building design. From designing industrial units to corporate headquarters the flexibility of Comar Aluminium Systems can integrate with panel systems and provide curtain wall with opening vents and windows in a variety of configurations. Comar can

powder coat the aluminium system to your RAL, BS or Syntha Pulvin colour to complement the façade.

Education & Public Building Aluminium Architecture

Comar have worked in conjunction with Local Authorities to design specific products for use in the education and public building sector. The nature of public building construction demands cost effective, robust solutions. Comar 2 is a cost saving alternative to curtain walling, creating glazed façades for medium rise buildings, stairwells and entrances. Comar 2 integrates with Comar 5 and 5LT windows with espagnolette locking handles to provide security and Comar 7 Doors with anti-finger traps to provide safety. Comar's integrated systems ensure a cost effective, aesthetic façade with security and safety as standard.

RIBA CPD Provider

Comar provides RIBA assessed CPD Seminars to architects and specifiers throughout the UK. There are two seminars available; please complete the feedback for further details.
