ARCHITECTURAL ALUMINIUM SYSTEMS

Foundry House

Comar Architectural Aluminium Systems supplied doors, windows and curtain walling profiles for Foundry House - a newly built modern looking office block in the heart of Maldon's business community. Anglia Fixing, a Comar approved fabricator, was involved in the project from the outset and worked with Baldwin Design Architects on the drawings.

The imposing atrium of the main façade is achieved with Comar 6 curtain walling, polyester powder coated in green. The slim 50mm sight lines allow curtain wall to cascade over the two floors from the eaves of the roof to the balcony above the entrance. The faceted feature of the curtain wall follows the protruding curve of the shallow balcony, thus bringing elegance to an already attractive atrium. Comar 6 is also used on the rest of the balconies and incorporates side hung Comar 5P.i windows for the opening vents. The polyamide insulated Comar 5P.i has a dual colour option and matches the green of Comar 6 on the outside and the inside. 24mm toughened glass, soft coated in anti-sun grey, is used throughout the envelope.

Comar 7 swing doors are integrated into Comar 6 to provide entrance and balcony doors. The successfully completed project can be attributed to Comar's systems inherent integration: the minimalist sight lines are kept throughout the façade, providing an aesthetic contemporary look to the building.

PROJECT DETAILS

Architects
Baldwin Design.

Fabricator
Anglia Fixing.

Main Contractor
WA Hills.

Project Value
£80,000.

Systems Used
Comar 5P.i, 6 and 7.

Location
Maldon, Essex.

Foundry House

Comar, the leading British Aluminium Systems House, designs and extrudes over 700 aluminium profile sections. A team of specification consultants provide project-by-project design, calculations and NBS specification advice to architects. Comar distributes profiles to a nationwide network of fabricators for manufacture and installation.

Retail Aluminium Architecture

Inherent strength and slim sight-lines make Comar aluminium the specification product of choice for all retail outlets. Comar offers extensive systems which integrate to provide aesthetic appeal to potential retail customers.

Step through Comar 7, an extensive range of sliding, automatic, folding or swing doors. Overhead Comar 6 creates sloped, pitched or barrel vaults which cast light throughout the retail complex or outlet. Comar 1,3,4 & 8 integrate with Comar 7 to provide shop-fronts with various angle returns and height capability. Comar 6 curtain walling houses the envelope with a variety of cover caps which complement panels and glazing.

Commercial Aluminium Architecture

Statement of function is the key element of commercial building design. From designing industrial units to corporate headquarters the flexibility of Comar Aluminium Systems can integrate with panel systems and provide curtain wall with opening vents and windows in a variety of configurations. Comar can

powder coat the aluminium system to your RAL, BS or Syntha Pulvin colour to complement the façade.

Education & Public Building Aluminium Architecture

Comar have worked in conjunction with Local Authorities to design specific products for use in the education and public building sector. The nature of public building construction demands cost effective, robust solutions. Comar 2 is a cost saving alternative to curtain walling, creating glazed façades for medium rise buildings, stairwells and entrances. Comar 2 integrates with Comar 5 and 5LT windows with espagnolette locking handles to provide security and Comar 7 Doors with anti-finger traps to provide safety. Comar's integrated systems ensure a cost effective, aesthetic façade with security and safety as standard.

RIBA CPD Provider

Comar provides RIBA assessed CPD Seminars to architects and specifiers throughout the UK. There are two seminars available; please complete the feedback for further details.
