

## Tooling Maintenance & Safety

### Maintenance

Clean the machine at the end of the day and check that all bolts and fittings are tight. When not using the machine for a long period oil-spray the various knives.

### Safety Precautions & Instructions

If parts of the machine, or the guards, need to be disassembled for any reason, make sure that the airline is disconnected beforehand.

#### Please be aware that:

- Exercise caution when handling heavy machinery.
- The machine should not be used without guards, with modified or missing parts, the manual contains the most important information needed to operate the machine safely.

The user should allow only persons who comply with the instructions of the manual to operate the machine.

The machine has been constructed and is being operated in line with the various CE regulations and directives.

#### It should be used:

- Only for the intended application.
- Only in perfect safe working order.
- Only according to the regulations and instructions in the manual.
- Only to be used with Comar Profiles

**Note:** Improper usage poses risks of injuries to people and could damage sub-units and material. The manufacturer, "Shoham Machines Ltd." cannot be held liable if the above is not strictly observed and adhered to.
